

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

1-34 (canceled)

35 (currently amended) A method to play a video poker game, the method comprising:  
performing on a gaming machine the operations of:  
displaying a first payable comprising ranks (R1,R2,R3,...) and respective first awards (F1,F3,F3);  
receiving a first wager;  
displaying an initial randomly dealt hand of cards face up to a player;  
allowing the player to identify held cards out of the initial hand, wherein cards which are not held cards are discards;  
displaying a second payable comprising ranks (R1,R2,R3...) and respective secondary awards (S1,S2,S3,), the secondary awards automatically updating based on the held cards and discards, each secondary award reflecting respective probabilities (P1,P2,P3,...Pn) of forming each respective rank on a draw based on the held cards and the discards, wherein if the secondary awards are sorted from highest to lowest then their corresponding respective probabilities to form respective ranks on the draw using the held cards and discards are in order ~~from~~from lowest to highest, wherein a first award from the first payable for a particular rank is higher than a second award from the first payable for a specific rank while a secondary award from the second payable for the particular rank is lower than a secondary award from the second payable for the specific rank;  
performing the draw by replacing the discards in the initial hand to form a final hand; and

paying the first wager using the first payable based on the final hand and paying a second wager made by the player before the draw using the second payable based on the final hand.

36. (currently amended) A method as recited in claim 35, wherein a sum of the secondary ~~payouts~~ awards multiplied by each secondary ~~payout's~~ award's respective probability of occurring after the draw based on the held cards and discards is a predetermined number.

37. (previously presented) A method as recited in claim 35, wherein if the held cards comprise a winning rank on the first payable, then a secondary award for the winning rank is automatically deactivated on the second payable.
